OPTIMAT QL

Fully automated loading of your stock. Faster & with optional buffer module.

The Optimat QL is an upgraded version of our popular MT.OPTIMAT external loading module. It processes boxes 20% faster and can be paired with a buffer option for increased processing capacity.
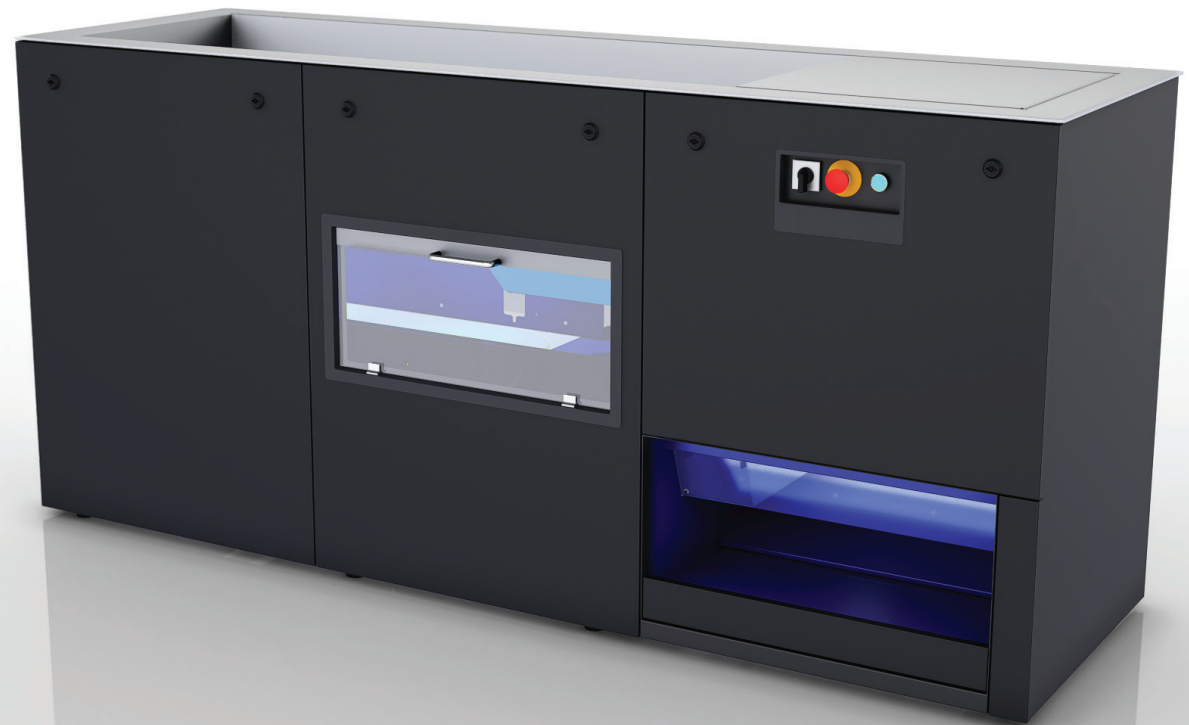

20% faster

Thanks to the state-of-the-art scanner, boxes are processed 20% faster.

Large reject tray

The enhanced reject tray eliminates the need for frequent emptying, allowing the Optimat QL to operate worry-free throughout the night.

NEW!

BUFFER OPTION

Optional buffer zone for your Optimat QL

The buffer is an optional module that can be combined with the Optimat QL.

Waiting zone

The buffer is installed inside the robot and acts as a holding area for already processed boxes. The manipulator picks up these boxes whenever it has a free moment, ensuring smooth workflow.
The boxes are arranged in multiple rows, providing additional processing capacity.
